

Debt/GDP change through $t+1$ without b_{it}

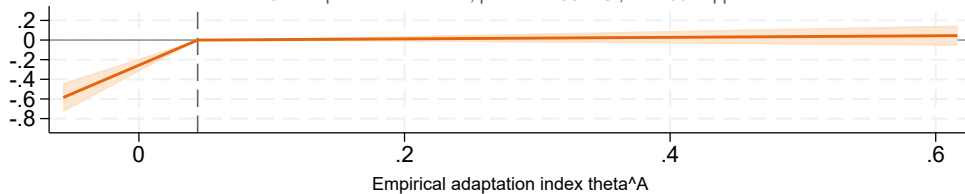

Full controls excluding current debt; pointwise 95% CI; P1-P99 support

Positive values imply a larger debt/GDP increase; dashed line: re-estimated debt cutoff.

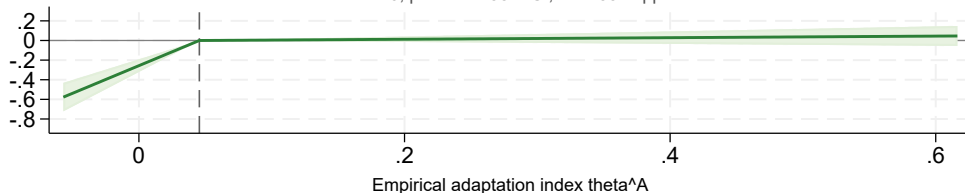

Readiness at $t+0$ without lagged A

Own-equation RSS cutoff; pointwise 95% CI; P1-P99 support

Positive values imply higher readiness; dashed line: readiness-equation RSS cutoff.

No-lag readiness at no-b debt cutoff

A at $t+0$; pointwise 95% CI; P1-P99 support

Dashed line: cutoff minimizing RSS in the no-b full debt equation.
